Operational Risk Management Certification for Financial Institutions | ORM Training Course

Course Overview:

The "Operational Risk Management Certification for Financial Institutions | ORM Training Course" is a comprehensive and interactive training course meticulously designed to address the complexities of operational risk within the financial services industry. Participants will explore in-depth Basel Committee operational risk requirements, ORM frameworks, regulatory compliance standards, key risk indicators, and practical incident data collection techniques. The course uniquely combines theoretical knowledge with real-world examples, covering risk appetite setting, risk governance, scenario analysis, capital modeling, and reputation risk management. Developed and facilitated by industry-leading experts, this course ensures professionals gain not only the essential skills but also recognition through certification. The program aligns with the latest regulatory updates and industry best practices, making it highly relevant for today's operational risk professionals.

Target Audience:

- Chief Risk Officers
- Heads of Operational Risk
- Risk Directors and Risk Managers
- Risk Analysts
- Compliance Officers
- Internal Auditors
- Regulators
- Consultants
- Senior Managers
- Financial Analysts

Targeted Organizational Departments:

- Risk Management
- Compliance and Regulatory Affairs
- Internal Audit
- Corporate Governance
- Financial Control
- Operations Management

Targeted Industries:

- Banking
- Financial Services
- Insurance
- Investment and Asset Management
- Regulatory Authorities

Course Offerings:

By the end of this course, participants will be able to:

- Implement Basel Committee operational risk requirements effectively.
- Establish and operate an operational risk management framework.
- Conduct comprehensive risk control self-assessments.
- Apply techniques for incident data collection and analysis.
- Set and manage financial institutions' risk appetite.
- Use key risk indicators effectively for risk assessment.
- Develop strategies for managing reputation risk.
- Perform scenario analysis and capital modeling.
- Foster a strong risk-aware culture within financial institutions.

Training Methodology:

This course uses diverse training methodologies, including interactive lectures, real-world case studies, and group discussions. Emphasis will be placed on collaborative exercises, allowing participants to practice risk control self-assessments, scenario analyses, and risk appetite setting. Case studies derived from actual incidents within the financial services industry will offer practical insights into incident data collection, regulatory compliance, and reputation risk management. Interactive sessions encourage active participation, critical thinking, and collaborative problem-solving. Regular feedback sessions ensure continuous improvement and comprehensive understanding of operational risk frameworks and best practices.

Course Toolbox:

- Comprehensive Participant ebook
- Case Study Packets
- Checklists and Templates for Risk Assessments
- Regulatory Guidelines and Standards Document
- Online Resources and Articles
- Examples of Risk Management Software

Course Agenda:

Day 1: Regulatory Context and Risk Governance

- **Topic 1:** Overview of Operational Risk Management and Basel Requirements
- **Topic 2:** Establishing ORM Frameworks and Policies
- **Topic 3:** Risk Appetite Setting in Financial Institutions
- **Topic 4:** Governance Structure for Operational Risk
- **Topic 5:** ORM Compliance Standards and Regulations
- **Topic 6:** Roles and Responsibilities in Risk Governance
- **Reflection & Review:** Recap and Group Discussions on Framework Implementation

Day 2: Risk Identification and Self-Assessment

- **Reflection & Review:** Key Learnings from Scenario-Based Planning

Day 5: Capital Modeling and Strategic Integration

- **Topic 1:** Operational Risk Capital Requirements
- **Topic 2:** Capital Modeling Techniques and Tools
- **Topic 3:** Strategic Integration of ORM Practices
- **Topic 4:** Preparing for Operational Risk Certification Exams
- **Topic 5:** Review of Course Concepts and Exam Tips
- **Topic 6:** Long-term ORM Strategies and Continuous Improvement
- **Reflection & Review:** Final Q&A Session and Course Feedback

FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

Participants should have a fundamental understanding of risk management principles or practical experience in financial institutions.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session lasts approximately 4-5 hours, totaling about 20-25 hours over the five-day course.

What's the difference between operational risk and enterprise risk management ERM?

Operational risk specifically involves risks arising from internal processes, people, and systems or from external events, while ERM covers broader risks, including strategic, market, and financial risks.

How This Course is Different from Other ORM Courses:

Unlike other operational risk management courses, this training emphasizes practical application integrated with the latest Basel Committee guidelines and regulatory compliance standards. Participants gain insights from actual industry scenarios, providing an applied understanding of ORM frameworks, risk appetite setting, incident data collection, scenario analysis, and capital modeling. By incorporating interactive discussions, practical exercises, and real-world case studies, attendees not only grasp theoretical concepts but also acquire actionable skills that are immediately applicable in financial institutions. Furthermore, the course uniquely fosters a deeper comprehension of key risk indicators and risk culture, essential for effective risk management and compliance in today's dynamic financial environment. Participants receive comprehensive preparation for recognized certification, ensuring they stand out in their professional field.
